

VBMS Smart Search

What is VBMS Smart Search?

Smart Search is enhanced VBMS functionality that allows users the ability to search Veteran eFolders, including all repositories in VBMS, without having to open them individually. This search functionality affords users increased efficiency and will result in a significant time savings.

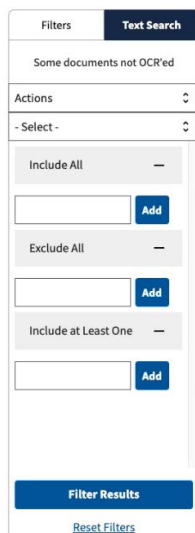

Benefits of Smart Search Functionality

With the new Smart Search Functionality, Claims Processors can now:

- Search Veteran eFolders, associated repositories and all document types (**Handwritten** or **Typed**) within **seconds**
- View source document information and reliability score of identified records
- Perform other VBMS actions while searching

What you can expect to see in VBMS Smart Search

Users can filter documents to include all, exclude all or include at least one.

The sidebar shows filter options under the 'Text Search' tab. It includes a note 'Some documents not OCR'd', an 'Actions' dropdown, and three filter sections: 'Include All', 'Exclude All', and 'Include at Least One'. Each section has a text input field and an 'Add' button. At the bottom are 'Filter Results' and 'Reset Filters' buttons.

Smart Search results will surface the following:

- Source Document (Title, Subject, Page Number, Hyperlink)
- Documents that were unable to be searched
- Text Search Match count
- User Friendly Views

Subject	Document Title	Document Type	Text Searchable	Text Matches
	20230328111748_data sheet.pdf	Award Print	Searchable	6
Rating Decision - Narrative	20230328110102 - narrative.pdf	Rating Decision - Narrative	Searchable	2
Rating Decision - Codesheet	20230328110102 - codesheet.pdf	Rating Decision - Codesheet	Searchable	1
