

# Tyler VB 4.1.0 Release Notes

Tyler's Veterans' Benefits (TVB) 4.1.0 includes several client-requested enhancements as well as new features designed to improve data entry and tracking. As always, see the updated TVB User Guide for additional information and instructions.

## Client Feedback Driven Enhancements

### Download Forms Directly From the VA

Using the VA Forms API, we've added the ability to download the latest version of all VA forms and edit them directly in TVB. We've added a new Document Category under Claim>>Document and Form called "Blank Form". This will allow you to download a blank version (no data will be populated from TVB) of any VA form that is available on their Forms website as soon as the VA publishes them.

While the VA has confirmed that previous versions of forms can be submitted electronically for one year after they are updated, this new feature is a great way to pull the latest version while we work on our getting the mapped version updated in your system, as well as view any change the VA has made.

### Calendar

A calendar is now available from the Quick Access section. More details about functionality are available in the TVB Calendar Quick Reference Guide.

### Additional Client Driven Enhancements

1. Added the 21-0845 form to list of forms available for Remote Signature
